Demo environment

Development Boards: Jetson Nano

SD (TF) card: 64G

It is recommended to run the 4B and below parameter models

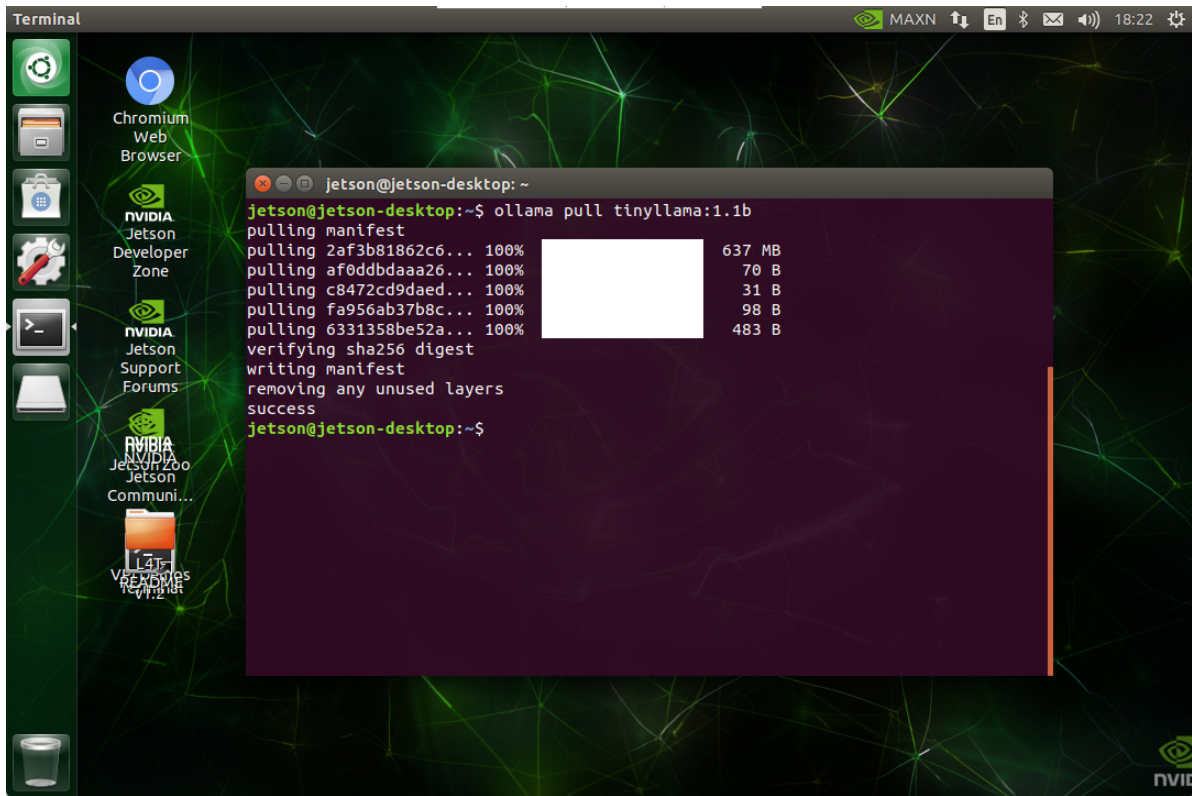

Model scale

Model	Parameter
TinyLlama	1.1B

Got TinyLlama

Using the pull command will automatically pull the model from the Ollama model library.

```
ollama pull tinyllama:1.1b
```

Use TinyLlama

Run TinyLlama

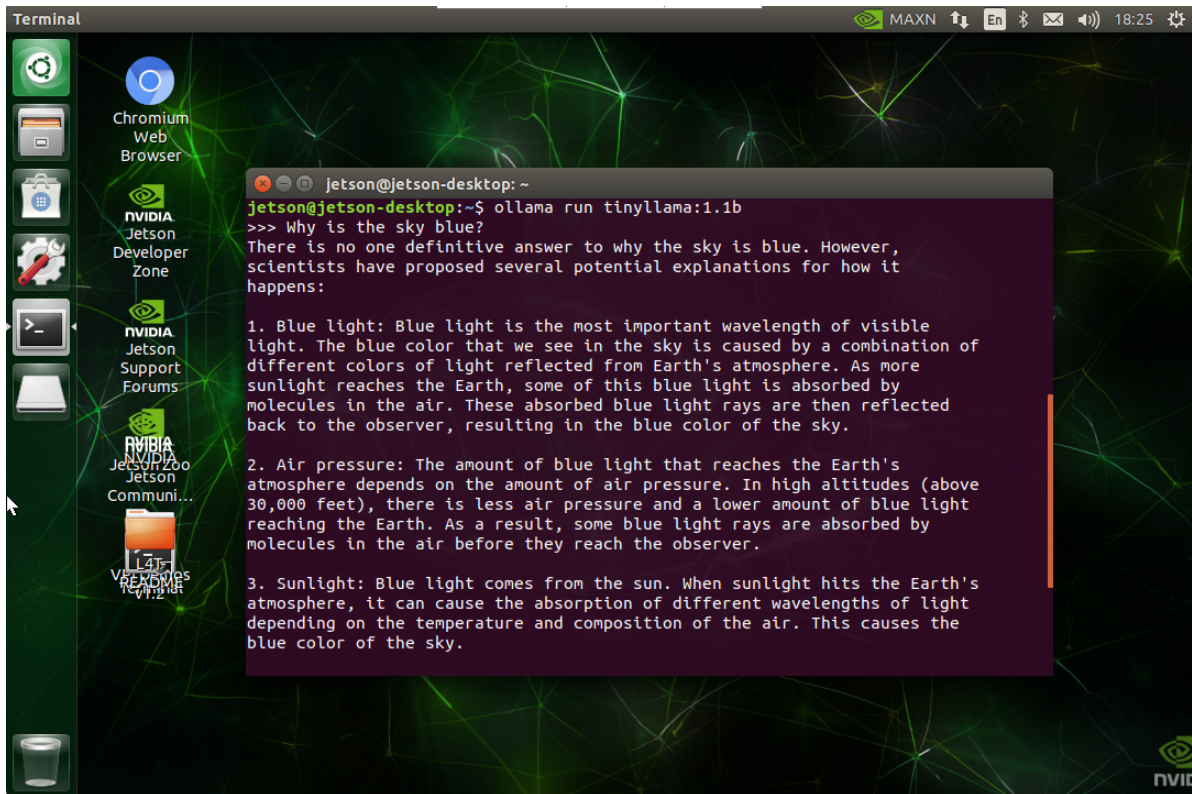

If the system does not have a running model, the system will automatically pull the TinyLlama 1.1B model and run it.

```
ollama run tinyllama:1.1b
```

Have a conversation

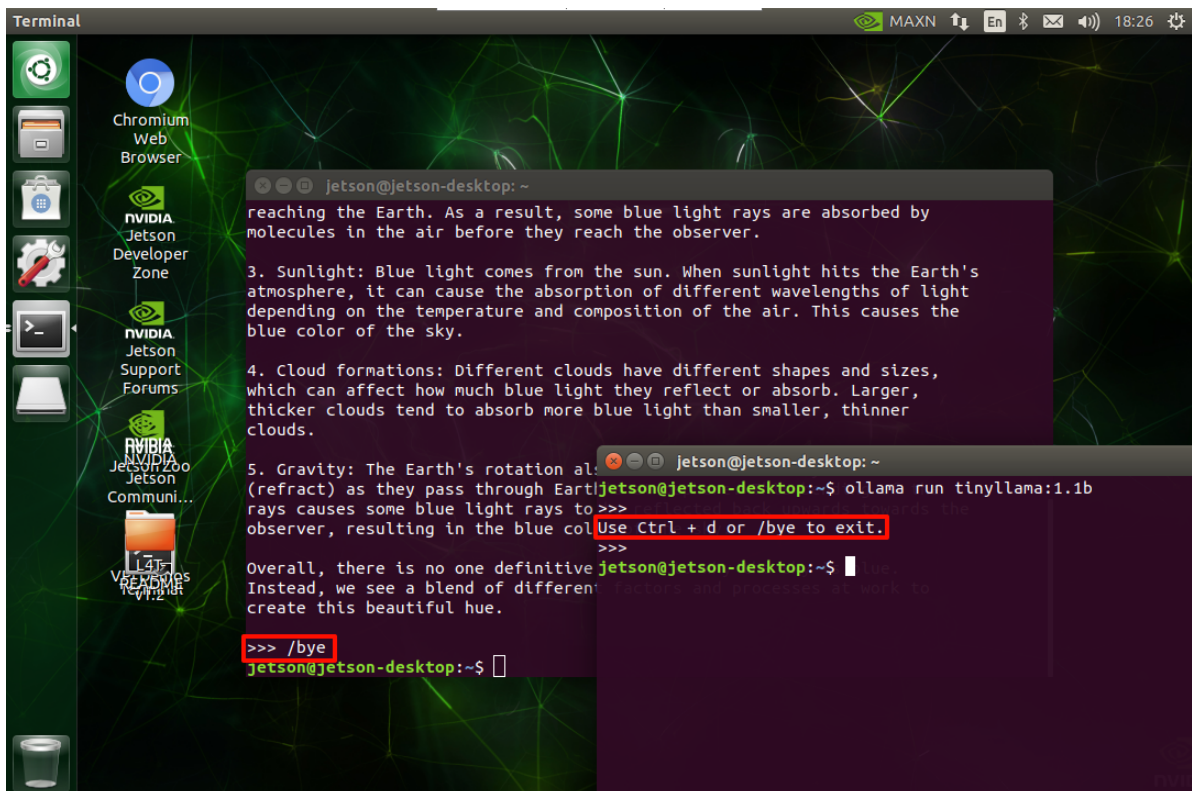

```
why is the sky blue?
```

The response time is related to the hardware configuration, please wait patiently.

End the conversation

Use the `Ctrl+d` shortcut or `/bye` to end the conversation.
